Not Diagnosed	77.9%	77.8%	79.1%	79.4%	79.1%	78.4%	76.4%	76.9%	77.0%

* A youth is counted once in each year, but the same youth may be counted in different years. An improved version of the assessment software was implemented in 2003.

Sources: Data from the Washington State Institute for Public Policy, *Washington State Juvenile Court Pre-Screen Risk Assessment*, for years 2004 through 2008. Data for 2009 through 2012 provided by the Administrative Office of the Courts, WA State Center for Court Research, last updated August 2013.

Note: Less than one percent of assessment data was reported as "missing" for each of the years.
